Double unwinder  
on elevated platform  
DAW-B

Roll diameter  
max. 1200 mm

Working width  
400 - 2000 mm

Production speed  
2 - 50 m/min

Material thickness  
30 - 1000 µm

## Application

Especially suited for unwinding plastic film paper, laminates, non-woven, etc. in continuous operation at low to medium speeds.

## Advantages

- ▶ execution with elevated platform for charging in various levels
- ▶ high quality splicing by rotary joining of both webs
- ▶ optimum material saving by optional automatic cross cutting system
- ▶ easy handling
- ▶ use of high value products from well-known manufacturers
- ▶ minor maintenance required

## Functional Highlights

- ▶ winding position alternating, pneumatic brakes and bearing caps
- ▶ rubber coated driven draw roller for wrinkle free winding
- ▶ fixing device to secure the new web prepared already with double faced adhesive tape
- ▶ manually initiated roll change (fully automatic optional)

## Options

- ▶ automatic splicing system
- ▶ cross register adjustment by bearing caps
- ▶ web accumulator to create a buffer during roll change
- ▶ dancer for adjustable constant web tension
- ▶ platform and framework for integration into existing production lines
