Stretch Film Winder SFW

Diameter of finished roll
max. 400 mm

Working width
800 - 2400 mm

Production speed
5 - 200 m/min

Material thickness
7 - 50 μm

Application

Specially developed for very low gauge stretch film from 7 μm up.
Alternatively usable for winding of flat film.

The stretch film winder can be used as double winder ("back to back")
but also as single winder.

Advantages

- ▶ processing of very low gauge stretch film from 7 μm up
- ▶ winding start without use of adhesives on sleeve and no flap forming
- ▶ alternatively usable for winding of flat film
- ▶ alternatively usable for turret winder, without open rotation phase
- ▶ easy change from contact winding to centre-contact winding
- ▶ recipe management for continuous production quality
- ▶ safe winding shaft change and winding start during operation without machine stop
- ▶ excellent for in-line operation

Advantages

- ▶ simple handling of heavy winding shafts with integrated handling device
- ▶ high operator protection by functional safety devices
- ▶ minor maintenance required
- ▶ excellent cost/performance ratio

Functions Highlights

- ▶ integrated web draw with slewable hardened chromium plated contact roller
- ▶ fully automatic cross cutter with serrated knife for flapless winding start on new sleeve
- ▶ winding start supported by electro static loading
- ▶ seam cut

Options

- ▶ longitudinal cutting device with cassette knives for separation into multiple webs with seam cut
- ▶ seam cut removal
- ▶ electro static discharge
- ▶ fully automatic side roll receiving carriage
