## Double Turret Winder ZWW

Diameter of finished roll  
max. 1500 mm

Working width  
500 - 2000 mm

Production speed  
10 - 200 m/min

Material thickness  
12 - 450 µm

## Application

For web made of film, paper, laminates and non woven in production process to be wound up for further processing.  
Ideally to be integrated in production lines like coating/laminating- or extrusion lines as a self-contained module.

## Advantages

- ▶ robust universal machine
- ▶ centre winding or centre-contact winding possible, easy setting at operator control panel
- ▶ no web or sleeve preparation for no-adhesive winding start
- ▶ adjustable constant web tension
- ▶ recipe management for continuous production quality
- ▶ fully automatic process at continuous web speed
- ▶ ergonomically designed safety devices for high operational safety, if necessary shut down of partial areas

## Advantages

- ▶ long term value by practical modular construction
- ▶ cost effective, solid universal machine
- ▶ safe winding
- ▶ minor maintenance required
- ▶ excellent cost/performance ratio

## Functional Highlights

- ▶ robust, almost maintenance free rotary discs
- ▶ fully automatic "no prep" splicing system with high speed cross cutter for continuous winding without stops
- ▶ integrated dancer control for constant web tension and adjustable winder characteristic
- ▶ roll removal with fork lift or with slewable roll inserter/ -discharger

## Options

- ▶ roll handling device for automatic or semi-automatic roll transport from winder
- ▶ splicing system for both winding devices
- ▶ longitudinal cutter with adjustable blade holders and suction nozzles for seam cut
